

WHAT IS PLYCEM

- **Plycem is a non-combustible building material having passed the stringent requirements of ASTM E136.**

Composed of Portland **cement**, **recycled** mineralized **cellulose fibers**, water and bonding agents, PlyCem **cement** board is non-toxic, contains no hazardous volatiles and is free of any asbestos or formaldehyde.

- **Plycem is rated for zero smoke development and zero flame spread in accordance with ASTM E84.**
- **Plycem is UL Rated for fiber cement walls of 1- 1.5 hours**
- **High impact resistance - Plycem is comprised of 72% Portland cement.**
- **Immune to attack by vermin and termites.**
- **Moisture and weather resistant -**
- **Installs with standard carpentry tools.**
- **Easily cut, shaped, or routed with standard carpentry tools.**

What is the guarantee of the product?

- The guarantee period offered by Plycem is 10 years, and it covers the Plyrock panels used in the construction sector for applications approved by Plycem.
- The useful life of a wall made with Plyrock is not less than that of a concrete wall since cement is the main component of Plycem materials

What Plycem products are available at AP Scott Trinidad Ltd
